

## University of Tokyo Environmental Measurements

Area: Komaba I Campus

| Sample collection location |            | Material collected     | Date of collection | Date of analysis | Measurement (kBq/kg)        |        |        |
|----------------------------|------------|------------------------|--------------------|------------------|-----------------------------|--------|--------|
|                            |            |                        |                    |                  | I-131                       | Cs-134 | Cs-137 |
| 1                          | North Gate | Soil (standard method) | 2011/7/14          | 2011/7/16        | Below measurement threshold | 0.02   | 0.03   |

※Mixed soil samples from a depth of 0 to 5cm were taken for analysis in accordance with the MEXT Environmental Sampling Methodology Radioactivity Measurement Series.
